CHAPTER 1

Platform Overview

Architecture, portals, and the login flow

1.1 What is the GENFIN Platform?

The GENFIN Operations Platform is an integrated, browser-based system that manages every function of the GENFIN Medical Aid Fund — from member enrolment and claims adjudication through to payroll, pharmaceutical inventory, and financial reporting. It is designed around a connected ecosystem where a single member record is shared across all modules, eliminating duplicate data and ensuring every department works from a single source of truth.

As Super Administrator, you have unrestricted access to every module and configuration option in the system. This guide will walk you through each module in detail.

Figure 1.1 — GENFIN Platform module structure

Design principles

Unified member record. Every staff module references the same member database. A change in Members is instantly reflected in Claims, Finance, and Inventory.

Role-based access. Each staff login has a role that restricts visibility to relevant modules only. Super Admins bypass all restrictions.

Full audit trail. Every action — approval, edit, deletion — is recorded with timestamp and operator identity. No action can be erased from the log.

BioVerify integration. Biometric fingerprint verification is embedded at the pharmacy dispensing point, preventing benefit fraud.

QR-backed policy documents. Every membership certificate carries a scannable QR code that instantly verifies the member's status with any provider.

1.2 Portal Architecture

The platform is split into four distinct portals served from a central login hub (**login-select.html**). Each portal has its own branding and authentication panel.

Portal	Audience	URL slug	Colour identity
Member Portal	Medical aid members	/portal.html	Gold — trust and benefit
Pharmacy Portal	Registered pharmacies	/pharmacy-portal.html	Green — health and go
Staff Operations	Claims, HR, Finance staff	/superadmin.html	Blue — operational calm
Super Admin	System administrators	/superadmin.html	Red — elevated authority

Table 1.1 — Portal directory and colour identity

1.3 Access & Login

Navigate to the platform URL in any modern browser. The login hub displays four portal cards. Click **Super Admin** (red card) to slide in the admin authentication panel. Enter your registered email and password, then press **Log In**.

Figure 1.2 — Admin login flow

■ **Security reminder**

Never share credentials. Every staff member must have an individual account.
Force password changes every 90 days for all admin accounts.

CHAPTER 2

Super Admin Dashboard

Your at-a-glance control centre

2.1 Key Performance Indicators

The dashboard opens to a four-tile KPI strip. These figures refresh each time the page loads.

KPI tile	What it measures	Action if abnormal
Active Members	Members with current valid plan	Investigate if unexpectedly low — check suspension queue
Claims This Month	All claims lodged in the calendar month	High volume may indicate fraud; review claims queue
Premiums Collected	Total income received and reconciled	Low vs. budget? Check employer group payment status in Finance
Staff Users	Active accounts across all roles	Audit regularly; deactivate ex-employees immediately

Table 2.1 — KPI interpretation guide

2.2 System Health Monitor

The 3-column system health grid shows live status for every platform service. A **green dot** means normal operation; **gold** means degraded; **red** means outage.

Service	Normal status	SLA uptime	If red — action
Member Portal	Green	99.99 %	Contact infrastructure immediately; notify members
BioVerify API	Green	100.00 %	Switch to manual ID verification at pharmacies
Claims Engine	Green	99.97 %	Pause claim submissions; escalate to IT
SMS Gateway	Green	99.95 %	Switch to email notifications
Database Backup	Gold	Maintenance window	Review backup schedule with DBA
Payment Rails	Green	100.00 %	Contact payment provider; hold disbursements

2.3 Recent Activity Log

A live feed of platform events appears below the health grid. Each entry has a colour-coded dot, event description, and elapsed time. Use this to monitor unusual patterns.

Dot colour	Meaning	Example events
Green	Approved / Success	Claim approved, member enrolled, payment processed

Gold	Pending / Warning	Pre-auth submitted, document awaiting review
Red	Error / Declined	Claim declined, login failure, system alert
Blue	Informational	Report generated, user logged in, sync completed

2.4 Staff User Management

The staff users table at the bottom of the dashboard lists every account. Columns: Name · Email · Role chip · Department · Last active. Click **Edit** to modify an account or **Deactivate** to suspend access immediately.

To create a new account, click **Add Staff User** (sidebar or "+ Add user" button). Complete the four fields — Full name, Email, Role, Department — then click **Add User**. An activation email is dispatched automatically. The new user must activate within 48 hours.

CHAPTER 3

Members Module

Managing 60,000+ member records

3.1 Member Directory

Navigate to **Members** in the sidebar. The page opens with a KPI strip followed by a filter bar and the member table.

Column	Description
Member #	Unique ID: format GF-XXXXXX
Name	Full member name as registered
Plan	Chip: Essential (grey) / Gold (gold) / Platinum (blue)
Dependants	Count of registered family members on this policy
Employer	Employer group — Individual if self-registered
BioVerify	Green tick = enrolled Orange = pending Dash = not enrolled
Status	Active (green) / Suspended (orange) / Lapsed (red)
Actions	"View" opens the detail slide-over panel

3.2 Member Detail Panel

Click **View** on any row to open a 520px right-side panel containing the complete member profile.

- Member photo (SVG placeholder until real photo uploaded)
- Plan badge with colour identity
- 3 KPI tiles: benefit used / claims count / last claim
- Contact table: phone, email, national ID, date of birth
- Employer and scheme start date
- Dependants list with relationship and date of birth
- Action buttons: Edit Profile · Suspend · Change Plan · Print Certificate

3.3 Filters & Real-Time Search

Filter control	Behaviour
Search box	Type any part of a name or member number. Results update instantly — no Submit needed.
Plan filter	Dropdown: All Plans / Essential / Gold / Platinum

Status filter	Dropdown: All / Active / Suspended / Lapsed
Source filter	Dropdown: All / Employer Group / Individual

CHAPTER 4

Claims Module

Reviewing, adjudicating, and processing claims

4.1 Claims Queue

Navigate to **Claims** in the sidebar. The header shows four KPI tiles followed by a type-filter bar and the claims table ordered by submission date.

Column	Description
Ref #	Unique claim reference: CLM-XXXXXXX
Member	Member name and GENFIN number
Type	Category chip: GP / Specialist / Hospital / Pharmacy / Dental / Optical
Provider	Healthcare provider or facility name
Submitted	Date lodged — shown as relative time ("2 days ago")
Amount	Claimed amount in USD
Status	Pending (gold) / Approved (green) / Declined (red) / Processing (blue)
Actions	"Review" opens the 480px claim detail panel

4.2 Adjudication Workflow

Every claim follows the flowchart below. Steps marked with a diamond are decision points where the system or operator makes a binary choice.

Figure 4.1 — Claims adjudication flowchart

4.3 Approving & Declining Claims

Click **Review** on a claim row. The detail panel slides in from the right and contains:

- Member block: name, plan, ID, date of birth
- Claim block: type, provider, date submitted, claimed amount
- Tariff comparison row — scheme tariff shown alongside claimed amount
- Documents: list of attachments (click each to preview)
- Notes text area — enter your adjudication rationale before deciding
- Approve and Decline buttons at the foot of the panel

■ ■ Tariff rule

Where claimed amount exceeds the GENFIN scheme tariff, only the tariff value is payable.
Document your rationale in Notes. Claims above \$5,000 require Claims Manager countersignature.

CHAPTER 5

HR & People Module

Staff directory, leave, payroll, and recruitment

Navigate to **HR & People** in the sidebar. The module has four tabs navigable from the tab bar at the top.

Figure 5.1 — HR module tabs

5.1 Staff Directory

A table of all 84 staff showing avatar initials, name, title, email, phone, department, and status chip (Active / On Leave / Remote). Click **Add Staff Member** to open the onboarding form. Fill all required fields and assign the correct role before saving.

5.2 Leave Management

The Leave tab shows pending applications. Each row shows: staff member, leave type, dates, days count, and Approve / Decline buttons.

Leave type	Days per year	Policy rule
Annual leave	22 days	Apply 5 working days in advance
Sick leave	10 days	Medical certificate required after 2 consecutive days
Study leave	5 days	Requires line manager pre-approval
Maternity / Paternity	Per Labour Act	HR policy document applies
Compassionate	3 days	Bereavement in immediate family only

5.3 Payroll Overview

The Payroll tab displays a read-only summary of the current pay run. Columns: Employee · Basic salary · Allowances · Deductions · Net pay. The footer shows total payroll cost for the period.

■ ■ Read-only data

Payroll figures are imported from the payroll system. To adjust salaries, use the payroll system directly then trigger a re-import from Settings > Integrations.

5.4 Recruitment

Open role	Applications	Current stage
Claims Officer	14	Shortlisting
Pharmacy Liaison	8	Interviews
IT Support Analyst	11	Advertising
Finance Officer	6	Offer stage
Member Services Advisor	22	Shortlisting
BioVerify Technician	5	Advertising

CHAPTER 6

Finance Module

P&L, collections, claims payments, and AR

Navigate to **Finance** in the sidebar. Four analytical tabs.

6.1 Profit & Loss

Line item	Current Month	YTD	Notes
Total Premium Income	\$2,446,540	\$14,679,240	Employer + individual contributions
Claims Expenditure	\$483,180	\$2,898,000	All approved claim payments
Operating Expenses	\$231,560	\$1,389,360	Staff, premises, technology
Net Surplus	\$1,731,800	\$10,391,880	Income minus all expenses
Loss Ratio	19.7 %	19.7 %	Claims / premiums. Target: < 25 %
Combined Ratio	29.3 %	29.3 %	(Claims + expenses) / premiums

6.2 Premium Collections

The Collections tab shows premium income by employer group: group name, expected amount, amount paid, balance outstanding, and a status chip (Paid / Partial / Outstanding). Outstanding balances older than 30 days should be escalated to the Finance Manager.

■ ■ Member suspension rule

Members in non-paying employer groups are automatically flagged for suspension after 45 days.
Approve or override suspensions from the Members module before they take effect.

6.3 Claims Payments & Accounts Receivable

The Payments tab lists all claim disbursements queued or processed in the current period. The AR tab shows outstanding balances from providers and employer groups. Both tabs offer an **Export to Excel** button for offline reporting.

CHAPTER 7

Inventory Module

Stock levels, purchase orders, and pharmacy network

Navigate to **Inventory** in the sidebar. Four operational tabs.

7.1 Stock Levels

Each medication row shows: product name, category, units in stock, a visual percentage bar (red < 30 %, amber 30-60 %, green > 60 %), and a status chip.

Medication	Category	Units	Level	Status
Metformin 850mg	Diabetes	140	14 %	CRITICAL
Enalapril 10mg	Cardiac	290	29 %	LOW
Amlodipine 5mg	Cardiac	440	44 %	WATCH
Amoxicillin 500mg	Antibiotic	780	78 %	OK
Paracetamol 500mg	Analgesic	1,200	96 %	OK

■ **Low stock alert**

Items below 20 % (CRITICAL) trigger an automatic alert to the Inventory Manager.
Raise a purchase order immediately to prevent member medication shortfalls.

7.2 Purchase Orders

Click **New PO** to raise a purchase order. Required fields: supplier, line items, quantities, delivery date, and authorising signature. PO statuses: Draft → Submitted → Approved → Delivered.

7.3 Pharmacy Partners

Lists all 340 registered pharmacy partners. Each entry shows: pharmacy name, location, terminal ID, BioVerify terminal status (Active / Offline), and monthly prescription volume. Deactivate a pharmacy from this screen if their terminal is flagged for fraud.

CHAPTER 8

Policy Certificates & QR Verification

Generating, printing, and scanning membership proof

8.1 Generating a Policy Certificate

A printable A4 Membership Certificate is accessible from the member portal document library (**portal-documents.html**) or from the **Print Certificate** button in the staff member detail panel. The certificate is generated dynamically.

Certificate element	Description
Gold border frame	Ornamental double-border with corner pieces — identifies document as official
Harare night skyline	Branded hero graphic — Harare city silhouette with the GENFIN seal overlaid
Member photo	SVG art placeholder — replaced with real photo when uploaded
Membership details	Member ID, plan, coverage period (1 Jan – 31 Dec), benefit limit
Dependants section	Rows for each registered family member with circular avatar
QR code	Encodes the verification URL: <code>verify.html?id=GF-XXXXX&year=YYYY&token=...</code>
Dual signatures	CEO and Registrar signatures (SVG cursive paths)
Official stamp	Circular GENFIN stamp with registration number
Authentication code	Unique alphanumeric code printed in the footer

To print or save as PDF: click **Print / Save PDF** at the top of the certificate page. In the browser print dialog, select *Save as PDF*. Print CSS hides all navigation so only the certificate content is printed.

8.2 QR Code Verification

Every certificate QR code links to **verify.html** with three URL parameters: member ID, policy year, and a unique security token. Healthcare providers scan this to confirm membership without contacting GENFIN.

Figure 2.1: QR verification flowchart

The verification page displays:

- Policy status banner: VALID (green) or EXPIRED (red)
- Member full name and GENFIN number
- Plan name and coverage period
- Masked national ID (for privacy: 63-28****87)
- Dependants listed with their names
- Benefit snapshot — 5 progress bars
- Pre-authorisation reminder note for the scanning provider

■ ■ Token security

QR tokens are year-bound. A 2025 QR code cannot return VALID in 2026 even if the URL is shared manually. Regenerate the certificate each year.

CHAPTER 9

System Administration

Users, roles, permissions, and the audit log

9.1 Adding Staff Users

New staff accounts are created only by Super Administrators. Navigate to the dashboard and click **Add Staff User** in the sidebar or the table header button.

Figure 9.1 — New user onboarding flow

Field	Required	Guidance
Full name	Yes	As it should appear in system reports and notifications
Email address	Yes	Must be a valid corporate email address. Used as login.
Role	Yes	Select from the role dropdown — see section 9.2
Department	Yes	Claims / Finance / HR / IT / Operations / Executive

9.2 Roles & Permissions Matrix

The platform uses a role-based access control (RBAC) model. The matrix below shows module access by role. V = full access, - = no access.

Module	Super Admin	Claims Mgr	Finance	HR Officer	Claims Off.
Dashboard	V	V	V	V	V
Members	V	V	-	-	V
Claims	V	V	-	-	V
HR & People	V	-	-	V	-
Finance	V	-	V	-	-
Inventory	V	-	-	-	-
User Mgmt	V	-	-	-	-
Audit Log	V	-	-	-	-

Table 9.1 — Role-permission matrix

Super Admin. Unrestricted access to all modules and system settings. Responsible for user management and audit log.

Claims Manager. Full claims adjudication authority including countersignature for high-value claims. Read access to member records.

Finance Officer. Full access to Finance module only. Read-only dashboard. No HR, Claims, or Inventory access.

HR Officer. Full access to HR & People module. Dashboard visible. No Claims, Finance, or Inventory access.

Claims Officer. View members and work the claims queue. Cannot approve claims above the threshold without manager countersign.

9.3 Audit Log

The audit log is an immutable record of every platform action. It is accessible only to Super Administrators. Entries cannot be edited, deleted, or hidden.

Logged field	Description
Timestamp	Date and time of action (UTC+2, Central Africa Time)
Operator	Staff user who performed the action (name + email)
Action type	Created / Modified / Deleted / Approved / Declined / Login / Export
Target record	Member, claim, or user affected by the action
IP address	Source IP of the session at the moment of action
Before / After	Previous and new field values for all edit-type actions

CHAPTER 10

Troubleshooting & Support

Common issues and their resolutions

Issue: Cannot log in — "Invalid credentials"

1. Verify the email matches your registered account.
2. Check that Caps Lock is not active. Passwords are case-sensitive.
3. Click "Forgot password?" on the login panel for a reset link.
4. If still locked out after reset, contact the IT Helpdesk.

Issue: A service shows Red on the system health monitor

1. Screenshot the dashboard and note the exact timestamp.
2. Follow the "If red — action" column in Table 2.1.
3. Notify the IT infrastructure team via the emergency line immediately.
4. Log the incident reference in the audit notes.

Issue: Claim is stuck in Pending with no action buttons

1. Another officer may have the claim open — it locks on open.
2. Refresh the browser and wait 5 minutes.
3. Check the audit log to identify the last operator who viewed it.
4. Ask the Claims Manager to force-release the record lock.

Issue: QR code scan shows EXPIRED for an active member

1. Confirm the certificate year matches the current plan year.
2. Check membership status in the Members module — plan must be Active.
3. If the plan is active, regenerate the certificate from portal-documents.html.
4. The new QR token will encode the correct year.

Issue: New staff user has not received the activation email

1. Confirm the email address was entered correctly.
2. Ask the user to check their spam / junk folder.
3. Allow up to 15 minutes for email delivery.
4. If still not received after 15 minutes, deactivate and re-create the account.

Issue: Finance figures do not match the payroll system

1. The Finance module shows imported data. A recent payroll run may not yet be imported.
2. Go to Settings > Integrations > Payroll Sync and trigger a manual import.
3. If discrepancy persists after sync, escalate to the Finance Manager.

Issue: BioVerify terminal shows offline at a pharmacy

- 1. Check the pharmacy's internet connection first.
- 2. Ask them to reboot the BioVerify terminal.
- 3. If still offline, contact BioVerify support on the emergency line.
- 4. Enable manual ID verification at that pharmacy until the terminal is restored.
